

# Protect. Heal. Care with Octenidine

## intensive care for irritated and fragile skin

- contains panthenol to support skin regeneration & bisabolol to reduce inflammation
- contains octenidine to help reduce odour forming bacteria
- ideal for sensitive and irritated skin areas e.g. atopic dermatitis or psoriasis
- suitable for incontinence patients and patients in intensive care
- used in caring for tattoos and scars & in follow up treatment of burns and sunburns

## mild & gentle antimicrobial wash lotion for whole body washing

- suitable for all skin types, even skin that is sensitive to soap or susceptible to allergies
- recommended for MDRO decontamination before surgery
- especially suitable for use on intensive care and infection wards
- added emollients for skin protection
- ideal for residents in care home settings

## hydrogel for wound cleansing, moistening and decontamination

- supports the natural wound healing process
- ideal for loosening encrusted wound coatings
- painless on application & proven to reduce scars
- used in the management of first and second degree burns
- ideal for contaminated and chronic wounds
- contains octenidine as a preservative, which is shown to inactivate pathogens after only 60 seconds, and forms a protective barrier against germs

## for fast, effective and gentle wound cleansing

- helps create a clean & moist wound bed to aid healing
- for the removal of wound crusts consisting of necrotic tissue, pathogens, biofilm and fibrinous films
- low surface tension is ideal for difficult to access areas, such as fissures and wound pockets
- ideal for soaking & gentle removal of difficult to remove, caked dressings/ wound pads
